## DETAILED ACTION

### *Allowable Subject Matter*

1. Claims 1, 3-11, 13-22, 24-31 are allowable over the prior art of record.

2. The following is an examiner's statement of reasons for allowance:

As per the independent claims, the claim language pertaining to replacing a missing voice segment by separating the formant from the residue of a nearby audio segment, processing the residue, and reintroducing the formant with the processed residue into the missing segment, is not explicitly taught by the prior art of record.

With respect to the prior art of record, Yeldener (5890108) teaches the use of formants and residue features to regenerate the signal (for interpolation, col. 4 lines 10-35); Wang et al (6499060) teaches tracking lost data and recovering such lost data by estimating between the non-lost segments (col. 1 lines 5-25; and col. 2 line 63 – col. 3 line 5), however, neither piece of prior art teaches the recited claim language noted above pertaining to separating the formant from the residue of a nearby audio segment, processing the residue, and reintroducing the formant with the processed residue into the missing segment.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
